

RULES OF TWO®

When is quick relief for asthma **NOT ENOUGH?**

DO YOU...

- Take your “quick-relief inhaler” more than **TWO TIMES A WEEK?**
- Refill your “quick-relief inhaler” more than **TWO TIMES A YEAR?**
- Awaken at night with asthma more than **TWO TIMES A MONTH?**
- Measure your peak flow at less than **two times 10 (20%)** from baseline with asthma symptoms?

If **YOU** can answer “**YES**” to any of these questions, **YOUR ASTHMA IS NOT UNDER CONTROL.**

Talk with your healthcare provider about adding a **LONG-TERM CONTROLLER™** (an anti-inflammatory inhaled corticosteroid) to your treatment plan. A “long-term controller” medication can help to **IMPROVE YOUR BREATHING** and **PREVENT ASTHMA EMERGENCIES!**
